Hi Craig,

On the Summa results, do we know where the canisters were located and what the results mean?

Thanks

Subject: Kankakee Summa Samples

Gentlemen,

I received the attached lab data for the Buckeye Pipeline incident in Kankakee. I believe the first four samples are splits of residential water. We grabbed splits at two locations that Buckeye had previously gotten some non-petroleum related results in. The objective of our splits was to confirm their hypothesis that their results were from lab contaminants.

The BKG samples were the summa sample results.

I have had Dr. Mark Johnson with ATSDR look over the results and he provided me with his evaluation. I will forward you his e-mail

Thanks

Lisa-

I was going over the report I just sent you. Some of the qc summary pages are out of order. We will send a revised report with the EDD.

I am sorry for the inconvenience, Tom
